Allowable Subject Matter

1. Claims 1 – 20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claims 1, 9, and 17 are directed to image forming apparatuses and a method for efficiently processing jobs in a printing system by making judgments based on the received jobs in order to route the jobs to the appropriate queues. These claims have the distinct feature of the combination of plural judgment sections: first for detecting if the proper paper size for the job exists, second for judging whether a job is a copy job, and a third for judging the number of copies if a copy job. Based on these judgments, the jobs are routed to one of 4 registers in an image forming apparatus with very specific features, all being included in one device. The closest prior art Motoyoshi et al. (US 6356721) teaches an image forming apparatus for controlling jobs executing them in session including the basic structure of the claims, but does not singularly or in combination teach all of the specific judgments and routing of the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
